Partners for Tomorrow:

A robust portfolio of sustainability solutions for our partners designed to help meet shared sustainability goals.

Be inspired by industry leaders.

The Sustainability Summit is a forum where all of PepsiCo's partners from across our entire value chain can come together to get the latest intel on the most important sustainability issues facing the food and beverage industry today, and what businesses can do to thrive.

Let's listen and learn together.

A few example topics

- Global and local sustainability trends
- Sustainability and the consumer: understanding consumer behaviors and priorities
- Deep dives into the most important topics of the day, from packaging to climate to the economic landscape

"I enjoyed the real world examples of product changes and the inclusiveness of showing how communities are impacted as well as how people can get involved at a community level."

"Enjoyed listening to all the speakers... there definitely needs to be more discussion across everyone in total in regards to sustainability."

"This was a great high-level presentation! Love all of the initiatives PepsiCo has put in place and continues to improve on. Thank you all for taking the time to present!"

ACCESS SUMMIT RESOURCES HERE

We're providing resources to help our partners reduce greenhouse gas emissions.

Through the Sustainability Action Center, you can take a quick assessment to determine your business's climate maturity level and find relevant resources to help guide you on your journey to reducing greenhouse gas (GHG) emissions.
